

MASTERPIECE OF CLEANLINESS  
**SATIS G**

# THE RITUALS OF WATER

Japan is a land blessed with water. Its waterscapes, from the white north to the green and blue south, are vast and deep. And for the people of Japan, water is at the heart of their culture.

For a long time, the people of Japan have used water to purify themselves physically and spiritually, from Temizuya, an act of purification by cleansing their hands and mouths before entering shrines and temples, to Karesansui where water is symbolized by the arrangement of stone, sand or gravel.

This deeply ingrained ritual is notably represented by rejuvenating time in an Onsen and ultimately into baths at the end of every day to wash away fatigue and prepare for the day ahead – renewed and revitalized.

INAX transforms the bathroom experience by creating beautiful, innovative products delivering Japan's rituals of water that make everyday life easier, healthier, and more enjoyable, enabling everyone to live well.

# PLAYING WITH LIGHT & SHADOW

For over 100 years INAX has been relentless in the pursuit of quality.

SATIS G embodies the very essence of INAX - to transform every bathroom experience through human-centric innovation and insightful design, enabling everyone to live well.

Anchored by Hygiene, Comfort and Convenience at its core, this shower toilet is crafted for the discerning who appreciate sophistication and thoughtfulness.

Inspired by Japan's nature, culture, and its four seasons, INAX celebrates a traditional element of Japanese architectural philosophy - the creation of spaces of unparalleled beauty through the interplay of light and shadow.

SATIS G is available in black and white with matte and reflective finishes to symbolically express the beauty of light and shadow in bathroom spaces.

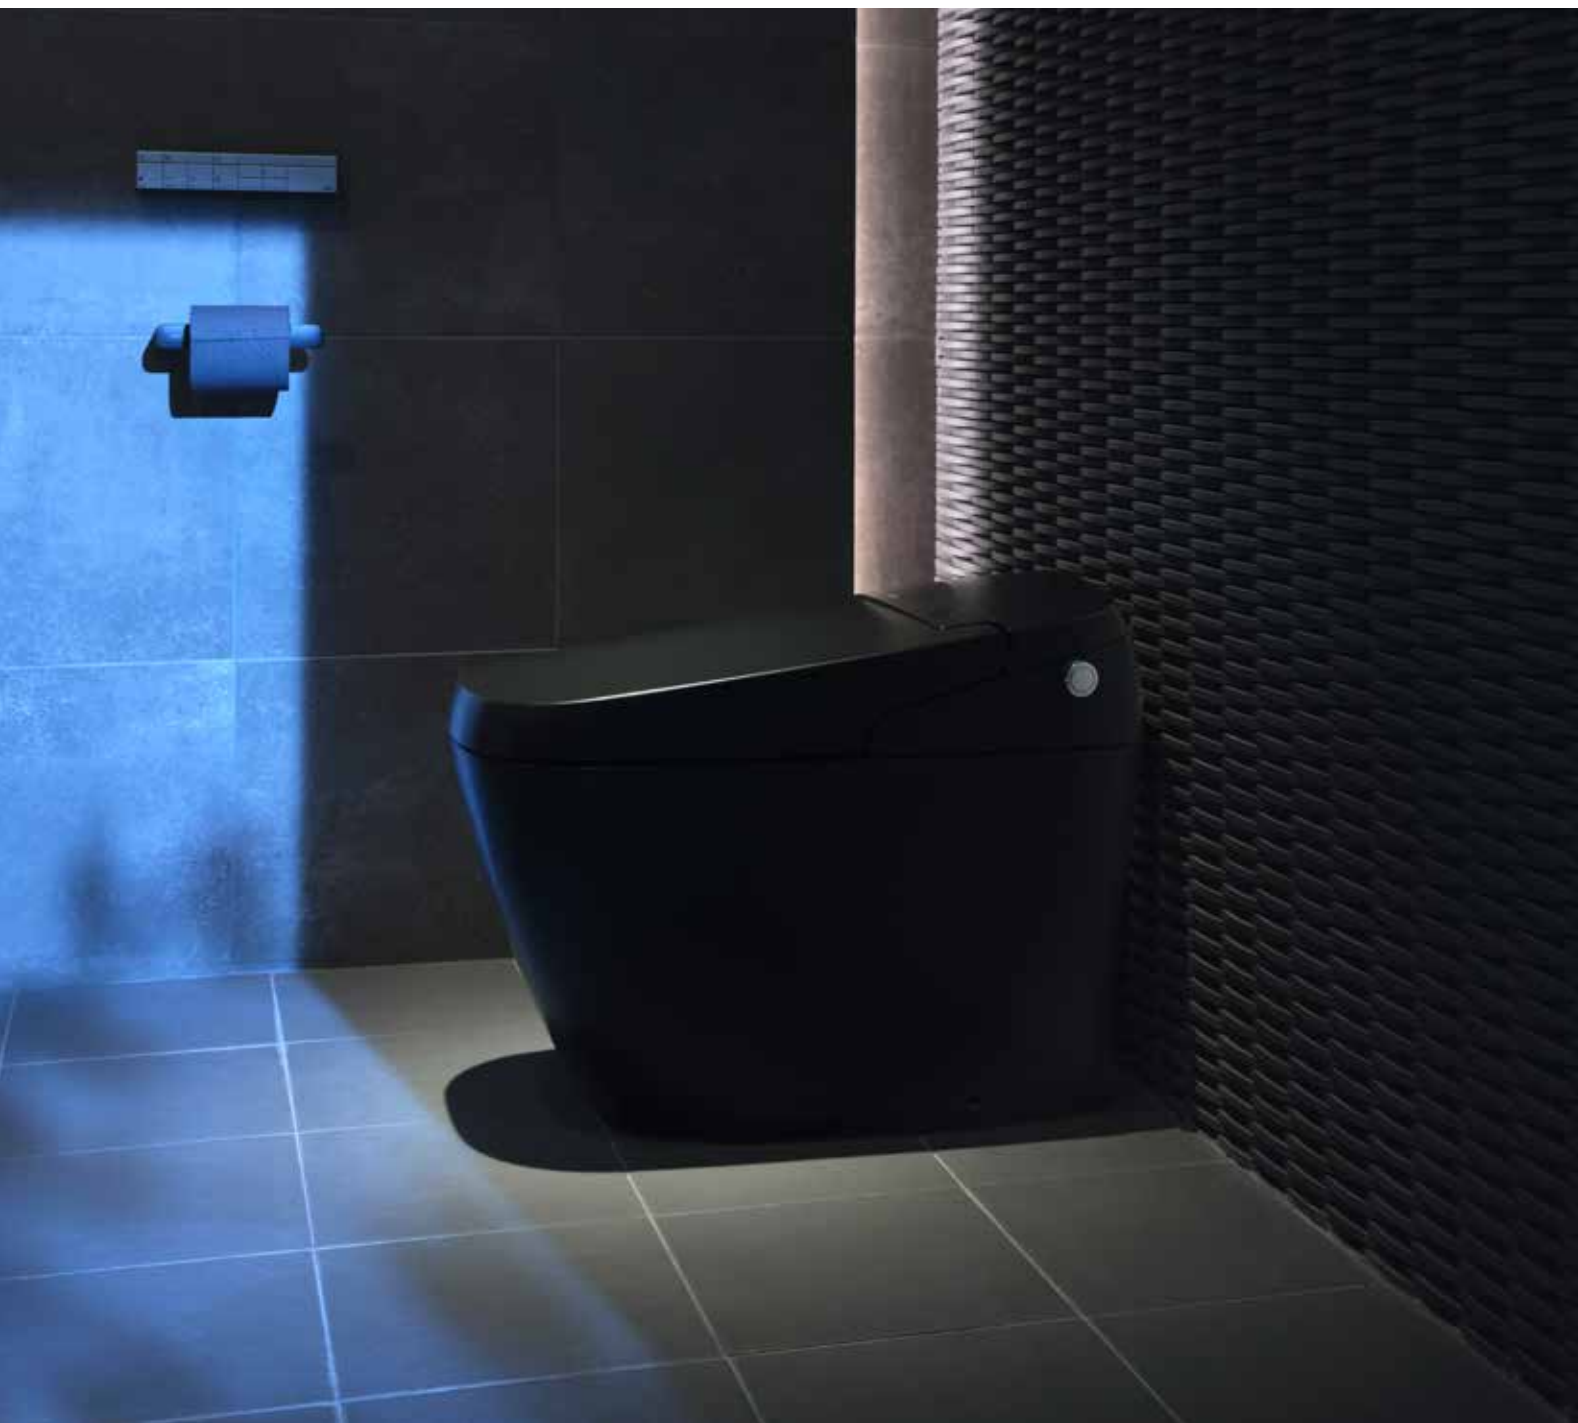

# SATIS G TYPE

## COMBINATION OF ART & SCIENCE

Compact yet luxurious. Sophisticated in technology and minimalist in design, the Japanese-made INAX SATIS G is art and science combined in one superior unit, aiming at complete 'SATIS-faction' in your bathroom.

Featured here is the SATIS G matte black which uses a high quality textured black glaze to its exterior for a refined elegance to modern bathrooms. The interior of the bowl is deliberately crafted in white for visible hygiene and cleanliness. This technique requires the highest level of craftsmanship to achieve and is truly unique to the SATIS G matte black.

# A MASTERPIECE OF HYGIENE

## AQUA CERAMIC / SIAA\*

Winner of the Good Design Gold Award, the revolutionary Aqua Ceramic technology features super-hydrophilicity on the ceramic surface, preventing lime scale and lifting stain from the surface with just the power of water for 100 years of clean and shine.

## SEAMLESS SEAT / SIAA\*

INAX SATIS G features a unique seamless toilet seat design that leaves no room for bacteria to hide, facilitating easy cleaning. INAX is also the first toilet brand to be SIAA\* certified for antibacterial efficacy on toilet ceramic and seats.

\*SIAA KOHKIN mark is a logo created by the SIAA (Society for Industrial Technology for Antimicrobial Articles) to be attached to antibacterial or "kohkin" products. The reliable KOHKIN SIAA mark is attached to products meeting ISO22196 requirements, with quality controls and disclosures in accordance with SIAA guidelines.

## TRIPLE VORTEX FLUSH

INAX Triple Vortex flush harnesses the force of three powerful jet streams to efficiently flush the entire bowl surface. The Power Drive technology is a strong electric pump that ensures, even with low water pressure, a formidable force that delivers an unprecedented level of hygiene.

## AUTO CLEANING AND DETACHABLE DUAL NOZZLE TIPS

Dual nozzles are equipped with self-cleaning feature which activates before and after each use and can be detached for manual cleaning. A flat nozzle shutter acts as a barrier to keep the nozzles clean when not in use.

## PLASMACLUSTER®

The patented Plasmacluster® Technology by Sharp generates negative ions and releases them into the bowl to effectively disinfect the air and reduce airborne bacteria and mold. The automatic release of ions completely sanitizes all parts of the toilet bowl, lid and seat to ensure peace of mind and comfort.

# A SENSE OF COMFORT REDEFINED

## FOAM CUSHION

With INAX SATIS G shower toilet, urine splash and noise is reduced via the Foam Cushion innovation. When the seat is lifted, the toilet automatically dispenses a 5-15mm thick micro foam on the water surface. It helps to significantly reduce urine splash upon contact with the foam, resulting in lesser clean-ups and minimal odor.

## AIR SHIELD DEODORIZER

This innovative technology generates a curtain of air within the toilet bowl to create a powerful deodorizing effect when in use. Circulating air shields odor from escaping the toilet, keeping the bathroom fresh and pleasant.

## DEDICATED SPRAY NOZZLES

Dual nozzle sprays are provided for dedicated posterior and feminine wash. Enjoy optimum comfort as both nozzle sprays are positioned at different angles with varying water pressure to provide the most comfortable cleansing experience.

# A WORLD OF CONVENIENCE

## **AUTO OPEN/CLOSE SEAT & COVER. AUTO FLUSHING**

Enjoy hands-free convenience with a toilet seat that opens upon approach and lowers upon exit. Auto flushing means there is no need to touch the toilet at all, elevating bathroom hygiene standards.

## **NIGHT LIGHT**

With a subdued night light that is comfortable on sleepy eyes, yet bright enough to lead one to the toilet, this delightful feature will ensure you can head right back to sleep after a visit to the bathroom.

# S600 LINE

In Japan, skillfully utilizing limited space and creating a beautiful world within has become a coveted art. The S600 LINE by INAX presents the ultimate combination of traditional Japanese design with modern sensibilities and innovation.

The collection presents a complete range of sanitaryware designed to create a bathroom experience that embodies Japanese ideas, technologies and culture. SATIS G is one of the many innovative products in the S600 LINE that is overtly Japanese in expression.

Through intelligently arranged products that look like pieces of art, subtly embedded with the spirit of Japanese hospitality, the bathroom space arranged with S600 LINE products helps bring about a deeper level of relaxation and vitality.

Enjoy a tranquil moment in the luxurious comfort of your S600 LINE bathroom and rejuvenate every day with the Japanese rituals of water.

INAX SATIS COLLECTION

Established in Japan since 1924, INAX is a recognized name in artistic ceramic tiles manufacturing and bathroom designs. With 50 years of expertise in ceramics and sanitaryware innovation, we cemented our place in the industry with the first made-in-Japan shower toilet with warm water shower spray and air dryer function created in 1967.

Today, INAX brings a blend of art and science into the creation of our shower toilets and delivers further comfort and cleanliness in your everyday life.

**SHOWER TOILET / SATIS G (WHITE)**  
W 375 / D 705 / H 540 mm  
Flushing volume 6/4.2 LPF

- Foam Cushion prevents urine splashing
- The build-in electronic pump helps generate a powerful flush, even when water pressure is low
- Air Shield Deodorizer prevents smells from leaking and deodorizes smells automatically
